data structures in enterprise information in the second intermediate form, and wherein any modifications of the other data structures in the enterprise information in the second intermediate form are independent of the custom data type elements;

modifying data in one of the other data structures in the enterprise information in the second intermediate form, wherein modification of data in the one of the other data structures in the enterprise information in the second intermediate form occurs without modification of data in any of the custom type elements;

transmitting the enterprise information that is in the target form to the target

computerized system for processing therein;

converting a copy of the enterprise information in the second intermediate form into

enterprise information that is in a second target form that corresponds to a second

target computerized system;

extracting second enterprise information in a third form that is associated with a second

source computerized system that is distinct from the first source computerized

system, wherein the third form is distinct from the first form;

converting the second enterprise information in the third form into second enterprise

information that is in the second intermediate form; and

converting the second enterprise information in the second intermediate form into second

enterprise information that is in the target form.

24. 22 (**Currently Amended**) A method in a computing system for managing enterprise data, the method comprising:

extracting first enterprise information in a first form that is associated with a first source computerized system;

converting the first enterprise information in the first form into corresponding first enterprise information that is in a second intermediate form; and

converting the first enterprise information in the second intermediate form into first enterprise information that is in a first target form that corresponds to a first target computerized system, wherein information that is in the second intermediate form
